Subject: Important Notice: Active Price Adjustments

Dear Valued Customer,

We hope this message finds you well.

During these unprecedented times, we are all navigating significant challenges across the global supply chain. For Interstate Wire specifically, the cost of our suppliers' essential raw materials — Copper and Aluminum — has reached record levels, and our supply base has implemented price increases across all products. These sustained increases, along with the recent announcement of a tariff on copper, have directly impacted the costs of our products as sourced.

As a result, Interstate Wire will be implementing price adjustments to reflect current market conditions. While we have worked diligently to absorb and minimize these impacts, the ongoing pricing trends now require a necessary adjustment.

Please know that Interstate Wire continues to actively monitor commodity markets and related factors. Our commitment remains focused on delivering the highest quality products and services at a competitive value, and we will continue to adjust responsibly as market conditions evolve.

If you have any questions regarding this update or how it may affect your products or orders, please contact your sales representative, who will be happy to assist you. We sincerely appreciate your understanding and continued partnership.

Best regards,

Patrick Moore
Sales Director
